

EPConnect Suite®

website integration suite for  EventPro® Software

take your
**venue booking &
event management**
online

EPConnect Suite connects your EventPro events and website, making it more convenient for staff and clients to work with your business.

- Provide access for unlimited users
- Improve staff collaboration
- Attract clients with better service
- Protect sensitive data

EPConnect Suite integrates with your EventPro data for real time access to key components of EventPro's functionality. No retyping or double entry – just accurate, efficient event management...**online**.

System Requirements

- Latest version of EventPro
- With EventPro On-Prem: .Net 4.7.2 or newer & IIS 7.0 or newer. The server on which you install EPConnect needs Read/Write access to your SQL server, and needs .NET & ASP enabled. If installing on a 3rd-party web host (must support .NET & ASP), you need to configure your SQL server to accept connections from outside its network.
- With EventPro Cloud: the optional EPConnect Suite is also hosted as part of the EventPro Cloud Service
- Knowledge of web servers in general
- For more details, see www.eventpro.net/technical-requirements.html

EPConnect Suite is modularized so you can customize it to your venue booking and event management needs.

EPConnect Calendar: View EventPro events on a web-based calendar with various display options. Use **Search** to find events, and **Find Space** to locate the ideal room for a booking.

EPConnect Bookings: Includes EPConnect Calendar functionality, PLUS the ability to create and edit bookings. The step-by-step Booking Wizard ensures important information is collected, and can include Setup and Catering item selection.

EPConnect Opportunities: Clients or prospects can add online event requests/inquiries, which are automatically pulled into EventPro for easy processing and quick response turnover.

EPConnect Attendee Online: Invite attendees to register online, enter contact information, buy items, select travel and accommodations, register guests, pay, upload documents, and more. You can also pre-register attendees for events, and send mail-merge email invitations personalized for each recipient with accept/decline links.

EPConnect Supplier: Your vendors can find updated, accurate online event supply lists at their convenience. It's also useful for scheduling temporary event staff.

EPConnect Invoices & Payments: Allow users and clients to make event and invoice payments conveniently online through your selected payment gateway. You can also create an online account portal, through which authorized contacts can log in to view, select, and pay invoices, and view previous payments.

EPConnect Exhibitor Portal: Through the online self-serve portal, Exhibitors can conveniently register for events, select booths, order equipment, enter contact information, upload documents, and more. Entered information is automatically downloaded back into EventPro.
